3. PURPOSE OF DEVELOPMENT

This site is required to provide radio coverage to the villages of Whaplode Drove, Holbeach Drove and Gedney Hill, located to the north east of Peterborough.

One2One's radio signal is limited in terms of coverage in this areas and a site is required to provide an acceptable level of coverage to their customers.

Flat agricultural land covers much of the cell area, with residential properties located mainly within the villages and along the main roads. There are no existing telecom installations in the area.

'Whaplode Water Tower' is a large existing water tower located to the west of the cell area. With no existing telecom equipment on the tower the installation is expected to provide an excellent level of radio coverage due to the flat terrain and height of the equipment with minimal visual intrusion to local residents.

Coverage plots are enclosed to show the expected level of radio coverage from 'Whaplode Water Tower'.
