What does HM Land Registry say about boundaries.

Property boundaries
You cannot treat the red edging on a title plan as identifying the exact position of a legal boundary or showing who owns a boundary feature. Even though plans are drawn to scale, you should not rely on a measurement scaled up from a title plan and related to the physical features on-site to locate the position of a legal boundary.

The law relating to boundaries is complicated, so if you need to establish the legal boundaries of your property, or if there is a disagreement with a neighbour about them, you may wish to consult a legal adviser. If neighbours agree on the precise position of the legal boundary between their properties, that agreement can be recorded in the register for each neighbouts property.
