*The majority of the site is situated within Flood Zone 1, however, a small part is situated within Flood Zone 2. Please, therefore, provide a site specific Flood Risk Assessment. This needn't be lengthy & is a document that you can produce yourself. The Flood Risk Assessment should include information such as to whether the site has previously flooded & the probability of flooding etc. The supporting statement refers to existing animals being on site so please confirm how the animals will be safely evacuated from site in the event of flooding.*

## STATEMENT IN ADDITION TO INFORMATION PROVIDED PREVIOUSLY IN

## 12 – ASSESSMENT OF FLOOD RISK

There has not been any evidence of flooding since we have owned the property, in the last three years.

The neighbours cannot remember the last time that the land towards the back of the paddock flooded.

In the case of any flooding, which would not happen in an instant and there would be heavy rain beforehand, the animals would be moved to the stables which is not near any flood risk.
