CASE OFFICER ASSESSMENT

Proposal

This is a full planning application for a proposed residential dwelling on garden land to the west of Rosedale, Dowsdale Bank, Shepeau Stow. This proposal seeks to provide a single storey dwelling comprising two bedrooms, main bathroom, a living/kitchen/dinning room, along with a utility room and a wc. The dwelling is to be constructed in Rustic Cottage Multi from the Durabase Britannia range brickwork, with a natural slate roof.

Site Description

The application site lies to the southern side of Dowsdale Bank, Shepeau Stow and consist of residential garden and is located within the defined settlement boundary of the area. To the north and southeast is open countryside, to the east of Rosedale is the village school and to the southeast and east are neighbouring dwellings. Dwellings in the immediate area are a variety of designs and materials.

History

H23-0709-99 - Erection of a 3 bedroom bungalow - Approved November 1999

H23-1093-99 - Erection of 2 dwellings, plus demolition of existing prefabricated bungalow - Approved January 2000

Consultation Responses

The responses received from consultees during the initial consultation exercises, which can be viewed in their entirety through the South Holland website, can be summarised as follows:

Whaplode Parish Council

Support - No comment

South Holland Drainage Board

Byelaw 3 (Surface Water)

The applicant has indicated that they intend to dispose of surface water via infiltration, however I cannot see that the viability of this proposal has been evidenced. We recommend that ground

investigation is carried out to determine infiltration potential, followed by testing in line with BRE Digest 365 if onsite material is considered favourable for infiltration. If infiltration is not feasible at this site, following the drainage hierarchy we would expect the applicant to propose to discharge surface water to a watercourse. In this case, consent would be required under Byelaw 3. Please note that we recommend that any discharge is in line with the Non-Statutory technical standards for sustainable drainage systems (SuDS), therefore the Board is unlikely to grant consent for discharges in excess of greenfield rate.

Byelaw 3 (Treated Foul Water)

I note that the applicant intends to treat foul waste using a package treatment plant, however I cannot see that the applicant has indicated how they intend to dispose of treated foul water from this development. If the applicant proposes to discharge treated foul water to a watercourse, consent would be required under Byelaw 3.

Section 23, Land Drainage Act 1991

I am not aware of any riparian owned/maintained watercourses within or adjacent to the site boundary, however this should be confirmed by the applicant. Should the applicant's proposals include works to alter a watercourse, or if works are proposed to alter a watercourse at any time in the future, consent would be required under the Land Drainage Act 1991 (and byelaw 4).

Byelaw 10

There are no Board maintained watercourses within or adjacent to the site boundary therefore Byelaw 10 does not apply.

Historic Environment Officer

The proposed development is in the centre of a number of recorded monuments. Archaeological investigation which has been carried out in the vicinity has recorded Romano-British cropmarks relating to field systems, settlement and saltmaking sites. Furthermore the medieval settlement of Shepeau Stow is also located adjacent to the site with artefacts dating to the 12th century recorded nearby. It is therefore likely that similar remains could exist on the proposed development site, which would be destroyed during groundworks.

Therefore, it is required that a programme of archaeological investigation take place prior to development to properly assess the impact of the proposed development on any surviving archaeological remains present.

SHDC Environmental Protection Officer

No comments

LCC Highways/SUDS

Recommendation: Approve with conditions

The proposal is for a new bungalow and it does not have an impact on the Public Highway or Surface Water Flood Risk. The proposed new access has sufficient visibility and suitable parking and turning space within the site to allow vehicles to enter and leave in a forward gear safely.

As Lead Local Flood Authority, Lincolnshire County Council is required to provide a statutory planning consultation response with regard to drainage and surface water flood risk on all Major applications. This application is classified as a Minor Application and it is therefore the duty of the Local Planning Authority to consider the surface water flood risk and drainage proposals for this planning application.

Public Representation

This application has been advertised in accordance with the Development Procedure Order and the Council's Statement of Community Involvement. In this instance, two letters of representation have been received.

These can be summarised as:

- Concerns regarding subsidence if trees are removed
- Concerns of where the work vans would be parked
- Noise would be an issue
- The proposed development would impact the character of the area
- Residential amenity impact to occupiers of Cherilea.
- Concerns regarding drainage
- Close proximity to the village school
- Potential overlook from the existing neighbouring dwelling.

Key Planning Considerations

The main issues and considerations in this case are (but are not limited to):

- Principle of Development and Sustainability
- Layout, Design and Impact on the Character of the Area
- Impact on Neighbouring Residents/Land Users/Land Uses
- Highway Safety and Parking
- Flooding Risk Considerations
- Foul and Surface Water Drainage
- Heritage Considerations
- Biodiversity

Evaluation

Section 38 (6) of the Town and Country Planning Act, as amended by the 2004 Act, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

In this case, the adopted South East Lincolnshire Local Plan 2011-2036, adopted March 2019, forms the development plan for the District, and is the basis for decision making in South Holland. The relevant development plan policies are detailed within the report above.

The policies and provisions set out in the National Planning Policy Framework (updated 2021) are also a material consideration in the determination of planning applications, alongside adopted Supplementary Planning Documents.

Furthermore, where a Neighbourhood Plan has been adopted, this alongside the adopted Local Plan, forms part of the Development Plan for the District, and must be considered when assessing development proposals. In this instance, no relevant neighbourhood plans have been adopted. The Authority is able to demonstrate a supply of deliverable sites equivalent to in excess of 5 years through the latest Housing Land Supply Assessment.

Principle of Development

The South East Lincolnshire Local Plan sets out the settlement hierarchy in respect of delivering sustainable development that meets the social and economic needs of the area whilst protecting and enhancing the environment; in order to provide enough choice of land for housing to satisfy local housing need, whilst making more sustainable use of land and to minimise the loss of high-quality agricultural land by developing in sustainable locations and at appropriate densities.

Policy 1 of the South East Lincolnshire Local Plan sets out a spatial strategy for delivering sustainable development across South East Lincolnshire to 2036. Policy 1 (Spatial Strategy) expresses this sustainable framework of settlements, ranking the settlements deemed to be most sustainable in descending order. The most sustainable locations for development are situated within the 'Sub-Regional Centres', followed by 'Main Service Centres'. Lower down the hierarchy in respect of sustainable development are areas of limited development opportunity including Minor Service Centres, with areas of development constraint comprising 'Other Service Centres and Settlements'. The countryside is at the bottom of the settlement hierarchy and represents the least sustainable location in terms of sustainability.

Policy 1 (Spatial Strategy) of the South East Lincolnshire Local Plan indicates that within 'Other Service Centres', development will be permitted that supports their role as a service centre for the

settlement itself, helps sustain existing facilities or helps meet the service needs of other local communities. This policy goes on to detail that development within Minor Service Centres will normally be limited to Committed sites and infill.

The National Planning Policy Framework (NPPF) outlines, within para 60, that "to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed, that the needs of groups with specific housing requirements are addressed and that land with permission is developed without unnecessary delay".

Para 69 of the NPPF also emphasises the importance that the contribution of small to medium sized sites can make in meeting the housing requirements. ("Small and medium sized sites can make an important contribution to meeting the housing requirement of an area and are often built-out relatively quickly"). This policy seeks to ensure that there is a sufficient supply of homes and advises that sites of all sizes make a contribution to the housing requirement of an area.

The application site in this instance is within Shepeau Stow, an 'Other Service Centres', and lies within the defined settlement boundaries as detailed by Policy 1. In context of this, the principle of residential development within this location is considered to be appropriate, comprising an appropriate form of development for the location and would be in accordance with the overall principles of the spatial strategy.

As such, the proposal is considered to be in accordance with the requirements of Policy 1 of the South East Lincolnshire Local Plan when viewed in principle. This is subject to the assessment against site specific criteria; including (but are not limited to) the impact of the proposal on the character or appearance of the area, impact on the residential amenities of neighbouring occupiers, impact on highway safety and flood risk, which are discussed in turn as follows.

Layout, Design and Consideration of the Character and Appearance of the Area

Section 12 of the National Planning Policy Framework (2021) specifically relates to 'Achieving well-designed places' and details that "The creation of high quality, beautiful and sustainable buildings and places is fundamental to what the planning and development process should achieve" and as such, it is generally accepted that good design plays a key role towards sustainable development.

Paragraph 130, contained within section 12 of the National Planning Policy Framework (2021), states that new development should function well and add to the overall quality of the area (including beyond the short term) and should be visually attractive as a result of good architecture and appropriate landscaping. This goes on to establish that it is important that new development should be of the highest quality to enhance and reinforce good design characteristics, and that decisions must have regard towards the impact that the proposed development would have on local character and history, including the surrounding built environment and landscape setting such as topography, street patterns, building lines, boundary treatment and through scale and massing. Development proposals should also ensure that developments create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users, among other considerations.

Proposals for new development would therefore require the aforementioned considerations to be adequately assessed and designed, including the siting, design and scale to be respectful of surrounding development and ensure that the character of the area is not compromised.

Likewise, policy 2 of the South East Lincolnshire Local Plan outlines sustainable development considerations for development proposals, providing a framework for an operational policy to be used in assessing the sustainable development attributes of all development proposals. Furthermore, policy 3 accords with the provisions of section 12 of the National Planning Policy Framework, in that it requires development to comprise good design; identifying issues that should be considered when preparing schemes so that development sits comfortably with, and adds positively to, its historically-designated or undesignated townscape or landscape surroundings.

These policies accord with the provisions of the National Planning Policy Framework and require that design which is inappropriate to the local area, or which fails to maximise opportunities for improving the character and quality of an area, will not be acceptable.

The proposed dwelling would be sited west of Rosedale Dowsdale Bank with the proposed layout

comprising an arrangement that would take up garden land; albeit the resultant garden space for Rosedale Dowsdale Bank would still be sufficient.

The proposal forms infill development, providing one detached dwelling continuing the linear form of Dowsdale Bank. The proposed dwelling is considered to be of a scale and design that is acceptable, reflecting the character and appearance of dwellings in the area and along the streetscene of Dowsdale Bank. The dwelling is to be constructed in Rustic Cottage Multi from the Durabase Britannia range brickwork, with a natural slate roof.

The garden to serve the proposed dwelling, whilst not being of the size of the immediately neighbouring properties that exist along Dowsdale Bank, would be of a reasonable size, being adequate for the enjoyment of future occupiers, whilst remaining appropriate in respect of the surrounding character.

Taking account of the design, scale and nature of the development, as detailed above, the proposal is considered to be acceptable. The proposal would not cause an adverse impact to the character or appearance of the area and would therefore be in accordance with policies 2 and 3 of the South East Lincolnshire Local Plan and Section 12 of the National Planning Policy Framework.

Impact on Residential Amenity/Land Users

Paragraph 130 of the National Planning Policy Framework (2021) states that development should create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users; and where crime and disorder, and the fear of crime, do not undermine the quality of life or community cohesion and resilience.

Policies 2 and 3 of South East Lincolnshire Local Plan (2019) sets out that residential amenity and the relationship to existing development and land uses is a main consideration when making planning decisions.

The closest neighbouring properties that are most likely to be impacted upon as a result of the development are Cherilea and Rosedale Dowsdale Bank.

Whilst the proposed dwelling would be in close proximity to the east side elevation of Rosedale Dowsdale Bank (approximately 0.39m) which includes windows at ground and first floor, it is considered that as the proposed windows are obscurely glazed serving the en-suite and bathroom, the impacts are not considered to be significant enough to warrant refusal of planning permission.

The proposed dwelling would be approximately 0.98m from the boundary to Cherilea the neighbouring property. There are four proposed windows facing this boundary that serve the living and two bedrooms. However, Cherilea do not have any windows on the elevation facing this boundary. A 1.8m boundary fence is proposed that will mitigate any potential for overlooking.

The proposal is not considered to result in any detrimental overlooking impacts on the neighbouring property of Cherilea Dowsdale Bank due to the orientation of the two properties.

As detailed above, the scale and design of the proposal is considered to be such that there would be no significant or unacceptable impact on the residential amenities of the occupiers of adjacent properties or land users, when also taking account of the conditions recommended. As such, the proposal is considered to accord with the provisions of the Section 12 of the National Planning Policy Framework, and Policies 2 and 3 of the Local Plan.

Highway Safety and Parking

Section 9 of the National Planning Policy Framework (2021) specifically relates to 'Promoting sustainable transport'. Paragraph 111 of the National Planning Policy Framework (2021) advises that "development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe".

In respect of highway matters, Policy 2 details that proposals requiring planning permission for development will be permitted provided that sustainable development considerations are met, specifically in relation to access and vehicle generation. Policy 3 details that development proposals will demonstrate how accessibility by a choice of travel modes including the provision of public

transport, public rights of way and cycle ways will be secured, where they are relevant to the proposal.

Further, policy 36, to be read in conjunction with Appendix 6 of the South East Lincolnshire Local Plan, sets out minimum vehicle parking standards and requires at least two spaces for dwellings of up to three bedrooms and three spaces for dwellings with four or more bedrooms.

The proposal is for a new bungalow and it does not have an impact on the Public Highway or Surface Water Flood Risk. The proposed new access has sufficient visibility and suitable parking and turning space within the site to allow vehicles to enter and leave in a forward gear safely. Lincolnshire County Council Highways/SuDS, as Local highways Authority, were consulted as part of the application process and no objections were raised.

The proposal would therefore be acceptable and would not have an unacceptable adverse impact on highway safety in accordance with Local Plan Policies 2, 3 and 36, and Section 9 of the National Planning Policy Framework.

Flooding Considerations

Section 14 of the NPPF requires development plans to "apply a sequential, risk-based approach to the location of development - taking into account all sources of flood risk and the current and future impacts of climate change - so as to avoid, where possible, flood risk to people and property. They should do this, and manage any residual risk, by: a) applying the sequential test and then, if necessary, the exception test as set out below".

Paragraph 162 details "The aim of the sequential test is to steer new development to areas with the lowest risk of flooding from any source. Development should not be allocated or permitted if there are reasonably available sites appropriate for the proposed development in areas with a lower risk of flooding", with the sequential approach being required in areas known to be at risk now or in the future from any form of flooding, with the flood risk assessment being the tool to demonstrate this.

If, following the application of the Sequential Test, it is not possible, consistent with wider sustainability objectives, for the development to be located in zones with a lower probability of flooding, the Exceptions Test can be applied if appropriate.

The site lies within Flood Zones 1 of the Environment Agency's Flood Maps. These have been created as a tool to raise awareness of flood risk with the public and partner organisations, such as Local Authorities, Emergency Services and Drainage Authorities. The Maps do not take into account any flood defences.

The South East Lincolnshire Strategic Flood Risk Assessment (SFRA) provides an overview of how flood risk has been considered in shaping the proposals of the Local Plan; including the spatial strategy and the assessment of housing and employment sites. Policy 4 of the South East Lincolnshire Local Plan is clear in that "Development proposed within an area at risk of flooding (Flood Zones 2 and 3 of the Environment Agency's flood map or at risk during a breach or overtopping scenario as shown on the flood hazard and depths maps in the Strategic Flood Risk Assessment) will be permitted" in instances where specific criteria is met.

It is worth noting that large parts of the district of South Holland lie within Flood Zone 3. It is therefore necessary to use the refined flood risk information (Hazard and Depth maps) within the South East Lincolnshire Strategic Flood Risk Assessment (2017) as a basis to apply the sequential test.

The site is located within Environment Agency Flood Zone 1 and is therefore in a sequentially preferable location in flood risk terms. The South East Lincolnshire Strategic Flood Risk Assessment (March 2017) (SFRA) indicates no hazard and no depth for the site.

The proposal would therefore be acceptable and would not have an unacceptable adverse impact on highway safety in accordance with Local Plan Policies 2, 3 and 36, and Section 9 of the National Planning Policy Framework.

Overall, when considering the development on balance, it is considered that given the mitigation measures detailed and recommended by condition, it is considered that the proposal accords with Policies 2, 3 and 4 of the South East Lincolnshire Local Plan and the intentions of the National

Planning policy Framework in this regard.

Biodiversity

Policy 28 outlines that a high quality, comprehensive ecological network of interconnected designated sites, sites of nature conservation importance and wildlife-friendly greenspace will be achieved by protecting, enhancing and managing natural assets. This policy details a need to address gaps in the ecological network by ensuring that all development proposals shall provide an overall net gain in biodiversity.

It is noted that a need for a 10% Biodiversity Net Gain is likely to be forthcoming within the near future; however, to date, this has not yet come into force.

Planning Balance

As detailed above, Section 38 (6) of the Town and Country Planning Act, as amended by the 2004 Act, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

The proposal represents appropriate development within the defined settlement boundary. The development hereby proposed does not materially harm the character or appearance of the locality, or amenity of nearby residents, and provides adequate parking, whilst conforming with the South East Lincolnshire Local Plan and the provisions of the National Planning policy Framework when viewed as a whole.

Conclusion

Taking the above considerations into account, the proposal is considered to comply with Policies 1, 2, 3, 4, 28 and 36 and Appendix 6 of the South East Lincolnshire Local Plan (SELLP), 2019, along with the identified sections contained within the National Planning Policy Framework (NPPF) 2021. There are no significant factors in this case that indicate against the proposal and outweigh factors in favour of the proposal and the policies referred to above.

It is recommended that the application is approved conditionally.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in discharging its functions) to:

- A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act
- B. Advance equality of opportunity between people who share a protected characteristic and those who do not. This may include removing or minimising disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).
- C. Foster good relations between people who share a protected characteristic and those who do not including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149. It is only one factor that needs to be considered, and may be balanced against other relevant factors.

It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based on the considerations set out in this report.

Recommendation

Based on the assessment detailed above, it is recommended that the proposal should be approved under Delegated Authority.
