CASE OFFICER ASSESSMENT

Proposal

This is a full planning application seeking permission to change the use of agricultural land to extend the domestic curtilage at Carlton Lodge, Oxcroft Bank, Shepeau Stow.

Site Description

The application site lies to the eastern side of Oxcroft Bank in Shepeau Stow. It was formerly occupied by concrete hardstanding. To the east and north of the site is open fields with a neighbouring dwelling to the south.

History

No relevant planning history.

Consultation Responses

Whaplode Parish Council

No comment

Public Representation

This application has been advertised in accordance with the Development Procedure Order and the Council's Statement of Community Involvement. In this instance, no letters of representation have been received.

Evaluation

Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

In this case, the adopted South East Lincolnshire Local Plan 2011-2036, adopted March 2019, forms the development plan for the District, and is the basis for decision making in South Holland. The relevant development plan policies are detailed within the report above.

The policies and provisions set out in the National Planning Policy Framework (December 2023) are also a material consideration in the determination of planning applications, alongside adopted Supplementary Planning Documents.

Furthermore, where a Neighbourhood Plan has been adopted, this alongside the adopted Local Plan, forms part of the Development Plan for the District, and must be considered when assessing development proposals. In this instance, no relevant neighbourhood plans have been adopted.

Principle of Development and Sustainability

The South East Lincolnshire Local Plan sets out the settlement hierarchy in respect of delivering sustainable development that meets the social and economic needs of the area whilst protecting and enhancing the environment; in order to provide enough choice of land for housing to satisfy local housing need, whilst making more sustainable use of land and to minimise the loss of high-quality agricultural land by developing in sustainable locations and at appropriate densities.

Policy 1 of the South East Lincolnshire Local Plan sets out a spatial strategy for delivering sustainable development across South East Lincolnshire to 2036. Policy 1 (Spatial Strategy) expresses this sustainable framework of settlements, ranking the settlements deemed to be most sustainable in descending order.

The most sustainable locations for development are situated within the 'Sub-Regional Centres', followed by 'Main Service Centres'. Lower down the hierarchy in respect of sustainable development are areas of limited development opportunity including Minor Service Centres, with areas of development constraint comprising 'Other Service Centres and Settlements'. The countryside is at the bottom of the settlement hierarchy and represents the least sustainable location.

Policy 1 (Spatial Strategy) of the South East Lincolnshire Local Plan indicates that within Countryside, development will be permitted that is necessary to such a location and/or where it can be demonstrated that it meets the sustainable development needs of the area in terms of economic, community or environmental benefits.

The application site in this instance is outside a defined settlement boundary and lies within the Countryside as detailed by Policy 1. Despite this, the application proposes to extend the domestic curtilage into the open countryside extending it by approximately 8.4m running the same width as the existing garden.

As the proposal is for an extension of an existing residential site, the proposal does not strictly accord with the requirements of Policy 1 of the South East Lincolnshire Local Plan when viewed in principle. However, given the minor nature, the exisitng hardstanding, and the surrounding context and prior development beyond, the proposal is considered to be acceptable when viewed as a whole.

This is subject to the assessment against site specific criteria; including (but are not limited to) the impact of the proposal on the character or appearance of the area and impact on the residential amenities of neighbouring occupiers which are discussed in turn as follows.

Layout, Design and Consideration of the Character and Appearance of the Area

Section 12 of the National Planning Policy Framework (December 2023) specifically relates to 'Achieving well-designed and beautiful places' and details that the "creation of high quality, beautiful and sustainable buildings and places is fundamental to what the planning and development process should achieve" and as such, it is generally accepted that good design plays a key role towards sustainable development.

Paragraph 135, contained within Section 12 of the National Planning Policy Framework (December 2023), states that new development should function well and add to the overall quality of the area (including beyond the short term) and should be visually attractive as a result of good architecture and appropriate landscaping. This goes on to establish that it is important that new development should be of the highest quality to enhance and reinforce good design characteristics, and that decisions must have regard towards the impact that the proposed development would have on local character and history, including the surrounding built environment and landscape setting such as topography, street patterns, building lines, boundary treatment and through scale and massing.

Development proposals should also ensure that developments create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users, among other considerations.

Likewise, Policy 2 of the South East Lincolnshire Local Plan outlines sustainable development considerations for development proposals, providing a framework for an operational policy to be used in assessing the sustainable development attributes of all development proposals. Furthermore, Policy 3 accords with the provisions of Section 12 of the National Planning Policy Framework, in that it requires development to comprise good design; identifying issues that should be considered when preparing schemes so that development sits comfortably with, and adds positively to, its historically-designated or undesignated townscape or landscape surroundings.

These policies accord with the provisions of the National Planning Policy Framework and require that design which is inappropriate to the local area, or which fails to maximise opportunities for improving the character and quality of an area, will not be acceptable.

Proposals for new development would therefore require the aforementioned considerations to be adequately assessed and designed, including the siting, design and scale to be respectful of surrounding development and ensure that the character of the area is not compromised.

The proposed land is located to the rear of the existing dwelling, as such the proposed extension of land would not be open to public view and would not be visible from the highway. The change of use would only include an 8.4m extension from the rear and would be bounded with a 1.8m close boarded fence. There would be no building works on site with the only development being the change of use. It is therefore considered that the proposed change of use of land to extend the residential garden at Carlton Lodge, Oxcroft Bank would not be a prominent or visually intrusive addition and would not cause an adverse impact to the character or appearance of the area.

Taking account of the design, scale and nature of the development, as detailed above, the proposal is considered to be acceptable. The proposal would not cause an adverse impact to the character or appearance of the area and would therefore be in accordance with policies 2 and 3 of the South East Lincolnshire Local Plan and Section 12 of the National Planning Policy Framework (December

2023).

Impact on Residential Amenity/Land Users

Paragraph 135 of the National Planning Policy Framework (December 2023) states that development should create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users; and where crime and disorder, and the fear of crime, do not undermine the quality of life or community cohesion and resilience.

Policies 2 and 3 of South East Lincolnshire Local Plan (2019) sets out that residential amenity and the relationship to existing development and land uses is a main consideration when making planning decisions.

It is not considered that the change of use of this land to be included within the curtilage of Carlton Lodge, Oxcroft Bank would have a detrimental impact on existing neighbouring residents. No overshadowing disturbance will arise following the approval of this application as the site does not propose any structural work. The proposal would also mean there is no overbearing or overlooking impact upon the adjacent neighbours. No objection has been received during the neighbour consultation of this application.

The nature of the proposal is considered to be such that there would be no significant or unacceptable impact on the residential amenities of the occupiers of adjacent properties or land users, when also taking account of the conditions recommended. As such, the proposal is considered to accord with the provisions of the Section 12 of the National Planning Policy Framework (December 2023), and Policies 2 and 3 of the Local Plan.

Biodiversity Net Gain

Section 15 of the National Planning Policy Framework (NPPF) seeks to protect sites of biodiversity value, minimise and provide net gains for biodiversity, including establishing coherent ecological networks that are more resilient to current and future pressures. Policy 28 of the SELLP seeks to protect ecological networks of interconnected designated sites and wildlife-friendly greenspace and promote biodiversity net gain by protecting the biodiversity value of land, maximising opportunities to enhance and connect natural habitats, incorporate biodiversity conservation features to enhance green infrastructure and ecological corridors, and conserve or enhance habitat to adapt to climate change.

Schedule 7A of the Town and Country Planning Act 1990 (inserted by the Environment Act 2021) requires developers to deliver a minimum of 10% Biodiversity Net Gain using standardized biodiversity units measured by statutory biodiversity metrics. This is often referred to as the mandatory requirements for Biodiversity Net Gain

For applications that are submitted prior to the introduction of this requirement, a standard biodiversity condition is appropriate and the mandatory 10% requirement would not apply. However, this application was submitted following the introduction of this legislation. As such, unless comprising development that is exempt from this mandatory Biodiversity Net Gain (10%), a condition would be required, as mandatorily set.

In this instance, a Biodiversity Net Gain Exemption Statement was submitted with the application. It is considered that the application is exempt due to the development taking place prior to the mandatory 10% Biodiversity Net Gain. In light of this, the development is this instance is exempt from the statutory 10% Biodiversity Net Gain requirements.

In light of this, the development is this instance is exempt from the statutory 10% Biodiversity Net Gain requirements. However, it would remain appropriate, given the context of Section 15 of the NPPF and requirements of Policy 28 of the South East Lincolnshire Local Plan, that a standard condition is attached, requiring a level of Biodiversity Net Gain.

Planning Balance

As detailed above, Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

The proposal represents appropriate development outside the defined settlement boundary. The development hereby proposed does not materially harm the character or appearance of the locality, or amenity of nearby residents, and provides adequate parking, whilst conforming with the South East Lincolnshire Local Plan and the provisions of the National Planning policy Framework when viewed as a whole.

In this instance, there are no material considerations that weigh against the proposal and as such, the planning balance is in favour of the development.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in discharging its functions) to:
A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act
B. Advance equality of opportunity between people who share a protected characteristic and those who do not. This may include removing or minimising disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).
C. Foster good relations between people who share a protected characteristic and those who do not including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149. It is only one factor that needs to be considered, and may be balanced against other relevant factors.

It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based on the considerations set out in this report.

Conclusion

Taking the above considerations into account, the proposal is considered to be in accordance with policies 2, 3, 28 and 36 (including Appendix 6) of the South East Lincolnshire Local Plan (SELLP) (2019), along with the identified sections contained within the National Planning Policy Framework (NPFF) (December 2023). The are no significant factors in this case that indicate against the proposal and outweigh the consideration in favour of the proposal and the policies referred to above.

Recommendation

Based on the assessment detailed above, it is recommended that the proposal should be approved

under Delegated Authority.
